

unit 1

A second solution is to use decimal numbers for names, like
102 51 153

- Advantages: it's easy for humans to recall and use decimal numbers; the numbers precisely define the color, in order RGB
- Disadvantage: the numbers have little meaning, they are almost just data

unit 1

A third and perhaps most popular solution is to use a new cipher, like
#663399
