Problem Set One: Output in Python
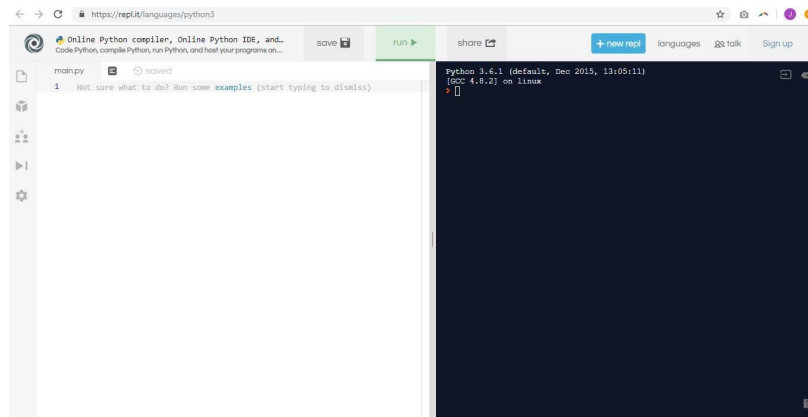

Let's get started coding with Python.

We'll be using an online Python editor. Open https://repl.it/languages/python3 in your browser. It looks like this:

This is where you'll type in the commands.

This is where the computer will run the commands.

Write a `print` instruction to teach the computer to display the following:

Press the "Run" button to check your code. When you are satisfied that you are correct, copy and paste your code into the box below.

Write a `print` instruction to teach the computer to display the following:

Press the "Run" button to check your code. When you are satisfied that you are correct, copy and paste your code into the box below.

Write three `print` instructions to teach the computer to display the following:

Press the "Run" button to check your code. When you are satisfied that you are correct, copy and
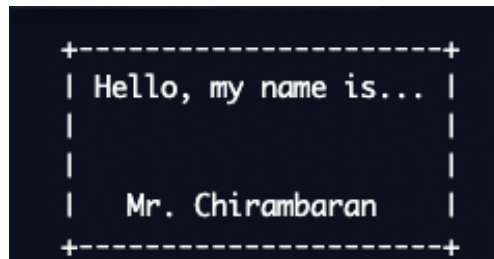

paste your code into the box below.

Write some `print` instructions to teach the computer to display the following name tag:

```
+----------------------+
| Hello, my name is... |
|                      |
|                      |
|    Mr. Chirambaran   |
+----------------------+
```

Press the "Run" button to check your code. When you are satisfied that you are correct, copy and paste your code into the box below.

Write some `print` instructions to teach the computer to display the following "die" (one of a pair of dice):

```
        .- - - -.
       /    o   /|
      /- - - -/o|
      | o     |  |
      |    o  |o/
      |      o|/
       .- - - -.
```

Press the "Run" button to check your code. When you are satisfied that you are correct, copy and paste your code into the box below.
